EDITORIAL

During the year 2017, I saw how our NGO was important and I thank Urvashi and Ananda my teachers who have been able to assess the educational needs in the academic structures of the Udaipur district.

The secret of their success has been being in harmony with the environment and they always had a positive attitude toward our children.

Our NGO opened an annexe to Chirwa in the former premises of Adarsh Public School, in the centre of the village and now in the Jagdish Temple area.

Urvashi coached English and French courses (children and adults), painting, manual activities, arts and crafts for youth.

Ananda coached Computer classes, Woodcarving and Carpentry to open the mind of the young children to the various techniques and opportunities they may have in the trades of wood.

The novelties of this year have been successful as well as the distribution of clothing, shoes for the winter as food in the balivaries; the courses given to the Masters and Bachelors to Mohanlal Sukhadia University for the Tourism and Hotel Management which helped students for their French exam.

The continuity of our website; and the program WinS (Wash in Schools)... book edited by Himanshu Publication in Udaipur for the Primary Schools.

Again a busy year which does not stop there since our NGO to still other ongoing projects for 2018.

Thanks to all of you to follow our continuity project in the joy.

. The Mission Of Voice Of Universal Education Society .

Govt Pragya Chakshu Senior Secondary Blind School UDAIPUR.

We offered a hundred meals in these blind children. A very strong moment in emotions.

Our mission is dedicated to the service of poor and disadvantaged children in our society and we are confident that we can do a long way.

Our NGO working for vulnerable children and we extend our ability to support these children in improving their lives. We visit orphanages and we provide food, support equipment and bring to the artistic activities to develop their mind thereby improving the conditions and quality of life in these structures, and on it is the excitement!

During these visits, we take the time to listen to them talk about their daily needs for a better life, better education and greater attention. Our NGO helps manage themselves through primary basic education, giving them ways to opening for artistic activities such as painting, modelling, the music, singing, learning of the languages English, French, computer, writing, woodcarving, cabinetmaking, joinery building, that can give them responsibilities and initiatives outlets.

We desire to develop manual dexterity in creating objects and encourage personal labour of children. We provide assistance material, educational, clothes and games for everyone, and if necessary the means more sophisticated for the community.

Education is vital for the economic, social and cultural development. Children should acquire basic knowledge by learning reading, writing, thanks to primary education that will enable them to develop their personalities and their identity as well as their physical and intellectual abilities.

Education goes through common principles for future generations and therefore preserves the values of a society. It improves the quality of life and provided to the disadvantaged a chance to emerge from poverty. It is an essential tool for all the population, a solid basis for a lifetime.

All children whether they are physically or mentally disabled or otherwise abandoned should have the same opportunity in education than any other. We focus all our efforts on this task because it is sharing mission that drives us.

Education is an essential element of the future of a child, a home for the children of the desert, the individual to go to school; sponsorship we help to change attitudes by bringing all our assistance necessary to develop them.

Our goal is to offer a school education, vocational training and greater self-confidence in young people and help them become stronger, more self-sufficient, supporting their needs as well as their families and communities.

We assist children in their duties by helping them improve their English, offering workshops on general knowledge, help the children in the hamlets with low access to water and hygiene to a chance to wash, to receive care and clothing and we have implemented a program on hygiene "WinS" Program.

We collect all of our talents, and it should be noted that we contribute also to the restoration and rehabilitation of local heritage, doors old, furniture, paintings Rajasthani or other.

Many children are waiting for sponsorship, we try to offer the tuition so that their future is best. Each sponsored child is supported regularly. This sustainable aid allows him to learn to read, write, count and be protected.

According to the program on the spot, there are three types of sponsorships or donations to help children:

- Nominative sponsorship for a child.
- Sponsorship of a group of children.
- Sponsorship of shares expanded to the community.

To grow a child must evolve into a strong and healthy environment. All the actions carried out and supported by Voice Of Universal Education Society are thus intended to improve the living conditions of the child and his classmates, his family, his community, through appropriate development programs.

Our children need to learn in good conditions wherever they may be.

छुट्टियों में स्कूलों की सफाई कर स्वच्छता का संदेश दिया
पेरिस के उर्वशी और आनंद कर रहे सामाजिक कार्य

उदयपुर। फ्रांस के पेरिस जैसे शहर को छोड़कर उदयपुर में बस गए वॉरर्स ऑफ यूनिवर्सल एजुकेशन सोसाइटी (एनजीओ) के उर्वशी और आनंद ने चौरवा के उच्च माध्यमिक बालिका विद्यालय में स्वच्छता का संदेश दिया। दस बच्चों के साथ मिलकर स्कूल परिसर की साफ-सफाई कराई और दीवारों को पेंटिंग कर खूबसूरत बनाया गया। स्कूल की दीवारों पर शिक्षण में उपयोगी चित्र बनाए गए। उर्वशी ने बताया कि वह तीन साल पहले भारत आए थे और पिछले दो साल से बच्चों के लिए स्कूलों में काम कर रहे हैं। उन्होंने बताया कि संस्था सोलंकी और प्रसाद मेनोश्री के साथ मिलकर चौरवा के इस स्कूल में तीन दिन तक साफ-सफाई का काम किया गया। स्कूल के दरवाजों, खिड़कियों आदि को पेंट किया। स्कूल में की दीवार पर एक बड़ी धड़ी पेंट की जिसकी सूर्यां बच्चे दृश्य में घुमा कर सही समय देखना सीख सकेंगे। उर्वशी और आनंद ने बताया कि इस महीने बच्चों को साबुन, दूधपेपर, दूधश्या आदि देकर उन्हें स्वच्छ रहने के लिए प्रेरित करेंगे।

यूरोप की दौड़-भाग वाली खुद के बिना जीने वाली लक्ष्य स्टाइल ने पेरिसन होकर फ्रांस निवासी लेखिका दमनी ने उदयपुर को अपना निवास स्थान बनाने का फैसला किया और वहां छोड़ वहां आ बसे। उन्होंने 6 माह पूरा उदयपुर में बसे बच्चों और वहां हिन्दू धर्म से पकड़ खाई की। हिन्दू धर्म स्वीकार किया। अब विद्यार्थी मंदिर जाऊ और भारतीय परंपरा से जीवन जीने की इनाम देया है। उदयपुर के बाजार में यह पहिल-पहिल लोगों के अंतर्राम का केन्द्र बन जाते है, उस महिला मठो पर सिंदूर, पेरो धिरिय और सुगण के अन्य धियाओं के साथ दिखती है। पहिल-पहिल दोनों के गले में रुद्राक्ष की माला है और उरुनी से बमरोते करवा लकी भूरोते। इनकी अजीबका पेरल ने धरती है और दोनों मिल कर यहां पर पौध भसा सिखा कर समज देवा भी कर रहे है। पेरो से दोनों रिश्ता कर रहे है।

सात दिवसीय आर्ट एंड क्राफ्ट कार्यशाला का आयोजन किया जा रहा है। विद्यालय संचालक जेटूसिंह ने बताया कि फ्रांस के आनंद एवं उर्वशी ने विद्यालय के नन्हें-मुन्ने बच्चों को खेल-खेल में पढ़ना सिखाया। इस दौरान बच्चों को इंग्लिश स्पोकन, कम्प्यूटर, वुड कार्विंग, वाल पेंटिंग, डेकोरेटिव क्राफ्ट आदि की बच्चों को जानकारी दी। इस दौरान उन्होंने बच्चों को शिक्षा के साथ भविष्य की टेक्निकल शिक्षा से खुद को जोड़े रखने का आह्वान किया।

(A School Volunteer Programme)

Here are the different stages of the manufacture of furniture, example table or bench which are offered to the student in the class of learning with all the necessary tools.

1. Rule plan:

This operation is to draw to scale 1 (actual size) the furniture to achieve a class table.

The map should appear all the sides of the furniture: front view, side view, seen from above to see all of the pieces composing the book with the assemblies and finished size parts.

Once the plan is completed, it allows meeting all sides of the pieces to make the flow map, with the marks of the school.

2. Flowsheet:

This document brings together all the parts of a book with the flow ratings (cut before machining size), the sides finished (after processing), and information specific to each part of assemblies (mortise, tenon, groove, hardware...).

This spreadsheet allows to calculate the cubage of the individual parts, the material used (wood, plywood, chipboard, hardboard, laminate, glass,...), and to estimate the cost according to the use that they must do or the final price desired.

3. Tracing of wood:

Using the flowsheet, all parts are drawn on planks of wood of different thicknesses depending on the sides. The sizes are increased by 1 Cm wide and 5-10 Cm in length. This allows getting rid of some defects like cracks or knots in the final cut.

4. Machining of wood:

First step cutting long pieces, then the widths. The next step is the establishment of the parts. This is to choose the most beautiful face of the part that will be visible on the finished piece of furniture outside. This established face bears the name of siding and is identified by a particular symbol on the plane on the rule.

. WOODCARVING CLASS .

. PROGRAM WinS (WASH in Schools) .

Learn how to strengthen the visual medium, paper and other accessories, by targeted examples specific to India and specifically in Rajasthan. Integrate the maximum pieces of information that can be used to supplement the subjects (ex: signals of danger on the packaging).

Refine the choice of videos of various media, synchronize them with the lessons of the program. Add interactivity between program WinS, drawings, videos and educational support brought to each lesson.

Each month during the weekly visits in schools program will be treated as follows:

Week 1: The lesson during which the topic will be presented and developed in full.

Week 2: A drawing session based on the subject matter.

Week 3: A general discussion with practical examples, using educational materials, the a replay of videos, passages to the blackboard, or by small groups of work by dividing the class around the subject.

An overview of the topic will be made at the end of the meeting for review.

Week 4: Exam on the topic of the month, in two parts:

1 - Oral question for each changing the questions every time.

2 - In blackboard passage to explain by the individual drawing what was taught.

The presence of the teacher is essential in the class where students don't understand English.

Implement sustainable program WinS in the current schools and those to come on the school year. Teaching good manners and hygienic basics to the new generation, make him aware of the real dangers to the poor conditions of hygiene or bad behaviour sometimes endangering the lives of others.

Pass the message to younger allow to disseminate within families and little by little throughout a community, settlement or village.

The year 2017, schools that we visited have all been favourable to the continuity of the current programme. In some classes, the school wished that the program is finished with the major classes before the holidays.

The pedagogical work, the tricks to wake students in the interventions, is a challenge facing at each change of class. All react in the same way to approach more or less difficult to treat subjects.

Visual and educational materials are necessary for the proper performance of the lessons. Too many reading without animation becomes boring and you quickly lose the attention of students.

The costs for this program are minimal because the support is the same every time. Educational tools, some are everyday objects often thrown in the trash at the normal time (example: toothbrush used, old water bottles or other jars in the earth, plugs, earth, chalk,...).

COMPUTER LESSON .

The goal is to introduce students to the basics of the main programs of office automation and design such as Paint, Word, Excel, Publisher, and Powerpoint.

In all schools where we have been for these courses, a review of this material will be made. Based on the results (older versions or obsolete equipment) we will come with our computers. We will put a minimum of 3 computers in place or will complete the number of computers already present on the spot.

Program Paint

This program will be offered to students who have not based on computer science. It will allow them through the drawing to make the first approach to the computing environment, how to use the mouse, different menus, and create a first personal document.

Program Word

After the opening of the program, students will be guided to open a new document in which they begin by writing a few words in English (full name, class, address, family,...). Then pagination with fonts of colours and different sizes. The next step will be to insert a WordArt or pictures (clip art or picture), from the Gallery of pictures that we provide also.

Program Excel

The first exercise will be to schedule the week of school in a table (days, lessons and time) and then will come to the formatting with change font background colour of the frame with colours...

The next step will be setting up a table with figures such as notes or sports scores (cricket), to create graphics in various forms.

Program Publisher

Freedom of choice will be left to the student to a personal grip. This program will allow him to create all kinds of documents, it will be able to see the various possibilities offered to them. The advice will be tailored to each case.

Program Powerpoint

For the more seasoned the Powerpoint program will allow students to make more elaborate presentations and can them be used to prepare more complex presentations for a possible explanation on the topic to the class.

Each student will be followed and guided in a personal way on each case according to the software used in the lesson. At the end of each session, all students files will be saved for future use, on media removable and preserved by the Professor of the NGO.
