EDITORIAL

Since more than one year you have begun an educational and pedagogical project through our NGO Voice Of Universal Education Society at Takshal International School at Tinwari in the Jodhpur district.

The need to stay in a sustainable way to develop new projects (WinS Program, Rurban, B.B.B.P., Swachh Bharat and others) in this sector justify the opening of an annexe of the NGO at Tinwari to avoid the lengthy and expensive travel each week knowing that you are Board Members of this school.

Thank you again for all the actions carried out in the field the last in the date of November 14, 2018, for the Children Day where you offered many educational toys for children of the Angar Wadi of Maruwas and also the R.O filter water to Maruwas government school, always on your equity.

Voice Of Universal Education Society has evolved in 4 years. You showed a lot of initiative, courage and you know bring smiles to isolated children.

With new projects 2019, you will develop on Tinwari (Aquaponics, organic farm, trades of the hood Center and Center bilingual English, French), we will be able to expand our activities in Rajasthan.

I wish you success until the new coordinates of our schedule.

Regards.

Mr Narendra KUMAR JOSHI

Chairman
Voice of Universal Education
Society, Udaipur (Raj.)

Narendra Kumar Joshi

. The Mission Of Voice Of Universal Education Society .

Govt Pragya Chakshu Senior Secondary Blind School UDAIPUR.

We offered a hundred meals in these blind children. A very strong moment in emotions.

Our mission is dedicated to the service of poor and disadvantaged children in our society and we are confident that we can do a long way.

Our NGO working for vulnerable children and we extend our ability to support these children in improving their lives. We visit orphanages and we provide food, support equipment and bring to the artistic activities to develop their mind thereby improving the conditions and quality of life in these structures, and on it is the excitement!

During these visits, we take the time to listen to them talk about their daily needs for a better life, better education and greater attention. Our NGO helps manage themselves through primary basic education, giving them ways to opening for artistic activities such as painting, modelling, the music, singing, learning of the languages English, French, computer, writing, woodcarving, cabinetmaking, joinery building, that can give them responsibilities and initiatives outlets.

We desire to develop manual dexterity in creating objects and encourage personal labour of children. We provide assistance material, educational, clothes and games for everyone, and if necessary the means more sophisticated for the community.

Education is vital for the economic, social and cultural development. Children should acquire basic knowledge by learning reading, writing, thanks to primary education that will enable them to develop their personalities and their identity as well as their physical and intellectual abilities.

Education goes through common principles for future generations and therefore preserves the values of a society. It improves the quality of life and provided to the disadvantaged a chance to emerge from poverty. It is an essential tool for all the population, a solid basis for a lifetime.

All children whether they are physically or mentally disabled or otherwise abandoned should have the same opportunity in education than any other. We focus all our efforts on this task because it is sharing mission that drives us.

Education is an essential element of the future of a child, a home for the children of the desert, the individual to go to school; sponsorship we help to change attitudes by bringing all our assistance necessary to develop them.

Our goal is to offer a school education, vocational training and greater self-confidence in young people and help them become stronger, more self-sufficient, supporting their needs as well as their families and communities.

We assist children in their duties by helping them improve their English, offering workshops on general knowledge, help the children in the hamlets with low access to water and hygiene to a chance to wash, to receive care and clothing and we have implemented a program on hygiene "WinS" Program.

We collect all of our talents, and it should be noted that we contribute also to the restoration and rehabilitation of local heritage, doors old, furniture, paintings Rajasthani or other.

Many children are waiting for sponsorship, we try to offer the tuition so that their future is best. Each sponsored child is supported regularly. This sustainable aid allows him to learn to read, write, count and be protected.

According to the program on the spot, there are three types of sponsorships or donations to help children:

- Nominative sponsorship for a child.
- Sponsorship of a group of children.
- Sponsorship of shares expanded to the community.

To grow a child must evolve into a strong and healthy environment. All the actions carried out and supported by Voice Of Universal Education Society are thus intended to improve the living conditions of the child and his classmates, his family, his community, through appropriate development programs.

Our children need to learn in good conditions wherever they may be.

QUILLING CLASS

WinS Program

Our " **WA.S.H. Program: W**ater, **S**anitation and **H**ygiene" already started in schools that we follow each month, is very important, it is a priority for the good of the students and their families, this program for the new year become **WinS Program: WASH in School**.

The detail of this program is :

- Are microbes dangerous
- The use of drinking water
- Faecal peril
- The urban waste
- Washing of hands
- Brushing of the teeth
- Cleaning of the body

Publish in 2017

They bring the teaching and visual material support and give to all needy students of hygienic equipment (toothbrush, toothpaste, soap, oil for hair, comb,...).

In each class, where students have not yet fully English mastered, the teacher translates in Hindi.

Lessons on each theme last on average 45 minutes during which the students are required to participate in a game of questions and answers; thus pushing them to reflect on the different scenarios. They use external materials such as earth, stones, paper, which allow to better understand the graphic support presented, then children are viewing on microscopic particles invisible to the naked eye.

They will in turn to the table to talk about what they have seen and done.

Mid-cycle a "review" is proposed to check the understanding of various topics by different classes of schools where URVASHI and ANANDA instruct the program

AT EACH END OF SESSION WE WILL PICTURES OF ALL DRAWINGS, WILL PUT IN A SLIDESHOW, AND OUR NGO AND WE WILL FINISH BY AN EXHIBITION OF DRAWINGS IN YOUR SCHOOL.

(A School Volunteer Programme)

Here are the different stages of the manufacture of furniture, example table or bench which are offered to the student in the class of learning with all the necessary tools.

1. Rule plan:

This operation is to draw to scale 1 (actual size) the furniture to achieve a class table.

The map should appear all the sides of the furniture: front view, side view, seen from above to see all of the pieces composing the book with the assemblies and finished size parts.

Once the plan is completed, it allows meeting all sides of the pieces to make the flow map, with the marks of the school.

2. Flowsheet:

This document brings together all the parts of a book with the flow ratings (cut before machining size), the sides finished (after processing), and information specific to each part of assemblies (mortise, tenon, groove, hardware...).

This spreadsheet allows to calculate the cubage of the individual parts, the material used (wood, plywood, chipboard, hardboard, laminate, glass,...), and to estimate the cost according to the use that they must do or the final price desired.

3. Tracing of wood:

Using the flowsheet, all parts are drawn on planks of wood of different thicknesses depending on the sides. The sizes are increased by 1 Cm wide and 5-10 Cm in length. This allows getting rid of some defects like cracks or knots in the final cut.

4. Machining of wood:

First step cutting long pieces, then the widths. The next step is the establishment of the parts. This is to choose the most beautiful face of the part that will be visible on the finished piece of furniture outside. This established face bears the name of siding and is identified by a particular symbol on the plane on the rule.

. PROGRAM WinS (WASH in Schools) .

Learn how to strengthen the visual medium, paper and other accessories, by targeted examples specific to India and specifically in Rajasthan. Integrate the maximum pieces of information that can be used to supplement the subjects (ex: signals of danger on the packaging).

Refine the choice of videos of various media, synchronize them with the lessons of the program. Axe interactivity between program WinS, drawings, videos and educational support brought to each lesson.

Each month during the weekly visits in schools program will be treated as follows:

Week 1: The lesson during which the topic will be presented and developed in full.

Week 2: A drawing session based on the subject matter.

Week 3: A general discussion with practical examples, using educational materials, the a replay of videos, passages to the blackboard, or by small groups of work by dividing the class around the subject.

An overview of the topic will be made at the end of the meeting for review.

Week 4: Exam on the topic of the month, in two parts:

1 - Oral question for each changing the questions every time.

2 - In blackboard passage to explain by the individual drawing what was taught.

The presence of the teacher is essential in the class where students don't understand English.

Implement sustainable program WinS in the current schools and those to come on the school year.

Teaching good manners and hygienic basics to the new generation, make him aware of the real dangers to the poor conditions of hygiene or bad behaviour sometimes endangering the lives of others.

Pass the message to younger allow to disseminate within families and little by little throughout a community, settlement or village.

The year 2017, schools that we visited have all been favourable to the continuity of the current programme. In some classes, the school wished that the program is finished with the major classes before the holidays.

The pedagogical work, the tricks to wake students in the interventions, is a challenge facing at each change of class. All react in the same way to approach more or less difficult to treat subjects.

Visual and educational materials are necessary for the proper performance of the lessons. Too many reading without animation becomes boring and you quickly lose the attention of students.

The costs for this program are minimal because the support is the same every time. Educational tools, some are everyday objects often thrown in the trash at the normal time (example: toothbrush used, old water bottles or other jars in the earth, plugs, earth, chalk,...).

COMPUTER LESSON .

Opening of an introductory class in the IT environment: Software and Hardware. What are a computer and multiple software used for occupation or leisure?

The goal is to introduce students to the basics of the main programs of office automation and design such as Paint, Word, Excel, Publisher, and Powerpoint.

In all schools where we have been for these courses, a review of this material will be made. Based on the results (older versions or obsolete equipment) we will come with our computers. We will put a minimum of 3 computers in place or will complete the number of computers already present on the spot.

Program Paint

This program will be offered to students who have not based on computer science. It will allow them through the drawing to make the first approach to the computing environment, how to use the mouse, different menus, and create a first personal document.

Program Word

After the opening of the program, students will be guided to open a new document in which they begin by writing a few words in English (full name, class, address, family,...). Then pagination with fonts of colours and different sizes.

The next step will be to insert a WordArt or pictures (clip art or picture), from the Gallery of pictures that we provide also.

Program Excel

The first exercise will be to schedule the week of school in a table (days, lessons and time) and then will come to the formatting with change font background colour of a frame with colours...

The next step will be setting up a table with figures such as notes or sports scores (cricket), to create graphics in various forms.

Program Publisher

Freedom of choice will be left to the student to a personal grip. This program will allow him to create all kinds of documents, it will be able to see the various possibilities offered to them. The advice will be tailored to each case.

Program Powerpoint

For the more seasoned the Powerpoint program will allow students to make more elaborate presentations and can them be used to prepare more complex presentations for a possible explanation on the topic to the class.

Each student will be followed and guided in a personal way on each case according to the software used in the lesson. At the end of each session, all students files will be saved for future use, on media removable and preserved by the Professor of the NGO.
