

Dadmiya Balivary 2014

[Home](#) > [Dadmiya Balivary 2014](#)

Taking the road of the bridge I turn right after the bridge... I go around the lake and it is the second school on the left... You have to cross a gully or there are buffaloes who bathe and climb the mountain to see this building.

A building used and dirty and I find children sitting on the floor... With nothing... My first impression is sadness...

There is only one post on the wall... The children are between 3 and 6 years. The master called Ramesh and help cook: sundry bay.

It is a place of daycare and the professor spoke English but he was very shy.

The NGO gives 8 kilos of rice and onions on a monthly basis. I have found difficulty in communication and education. Each month children are weighed. It is a place sad and free of life. They need slates and educational games.
